

**i3Assessment** engine assists users in the administration, creation, delivery and tracking of assessments. The system works independently from the LMS. **i3Assessment** is highly customisable to unique industry needs.

# Inchon **i3Assessment**

## Custom-made Online Assessment Engine

**i3Assessment** conforms to IMS QTi International Standards. The IMS QTi (Question and Test Interoperability) initiative defines a standard format that allows interoperability for questions and tests between different computer systems.

**i3Assessment** can be deployed concurrently with Learning Management System (LMS) allowing separate systems to handle different access loads while allowing data exchange between the two systems.

- **Questions can be randomly picked from several question pools; or randomly picked from different levels of difficulty**
- **Questions can be re-used and can be edited**
- **Includes Multiple Choice, Fill in the blanks, True or False and Multiple response.**
- **Auto-marking and auto-grading immediately after quiz submission.**
- **24x7 reports**
- **Multiple access keys ensure security before deploying tests**
- **QTi standards allow import and export of questions**

**i3Assessment** help organisations in creating, deleting and editing questions. With its own database of questions at hand, the school can readily pull out questions to create assessment, quizzes, and tests. A detailed reporting allows different access for students, students, HODs and the principal. Analysis includes reports on student, class, level, school and question analysis.

### **i3Assessment — Key benefits to users**

Students can...	Instructor can ...
<ul style="list-style-type: none"> <li>• Enroll to quizzes</li> <li>• Withdraw from enrolled quiz</li> <li>• Access quiz anytime, anywhere</li> <li>• Attempt quiz</li> <li>• View quiz before submission</li> <li>• Submit quiz</li> <li>• View quiz report</li> </ul>	<ul style="list-style-type: none"> <li>• Manage quizzes with an extensive assessment engine</li> <li>• Manage, develop &amp; assign tests and test sets</li> <li>• Register &amp; manage students</li> <li>• Deploy from anywhere, anytime</li> <li>• Create question banks &amp; assessments</li> <li>• Track student progress</li> </ul>

## Custom-made Online Assessment Engine

### Value-added Features

- Affordability and Scalability** The pricing model for **i3Assessment**, based on annual or perpetual licensing of the software, is extremely competitive. The system is highly scalable, allowing for low initial deployment costs.
- Standards Compliance** The system could also be easily integrated with other LMS and content management systems and any back-end systems.
- Fully Customizable** Highly flexible platform can be customized extensively to suit customer's requirements, due to the multi-tier, template-based architectural design
- Proven System** Many learning institutions make use of our system and find its performance more than adequate for their needs.
- LMS Interoperability** **i3Assessment** is built on international standards and specifications to enable the system to import the content created using these standards. It supports interoperability in managing assessments. The system uses IMS QTI standards to build its assessment engine, so that it is capable of importing or exporting the assessment packages that are created using the IMS QTI specifications.
- Question Bank** This allows users to organize questions into topics, or other logical divisions. They can use the bank to create tests, quizzes etc.
- Assessment Module** This component would input questions and responses like multiple choices, true-false, fill in the blanks and many others. User could also add graphics to illustrate questions with maps, graphics, logos and diagrams.
- Reporting Module** This module involves the tracking of the amount of time and frequency, scores of each assessment and subjects. There are different levels of access like student, teacher, principal; different views i.e. students, class, levels and question analysis
