

i3Corporate, a highly customisable eLearning platform, is suitable for online training requirements of corporations. It assists Human Resources and training departments to increase employee productivity while lowering costs through educating employees.

Inchone i3Corporate

eLearning platform for Corporate Learning

i3Corporate, a comprehensive web-based learning management system that acts as a closed-loop corporate training solution, is designed as an organisation's gateway into all available learning resources

i3Corporate supports both traditional event-driven programs (Instructor-led training, web-based training, etc) as well as newer continuous learning options (discussion forums, chat sessions, etc).

i3Corporate, linked into any existing web-based infrastructure to leverage on existing Learning and Development investments, enables organisation to combine related educational opportunities to cross-promote programs / content and create streams of information that regularly flow to individuals selected based on profiles or interest.

i3Corporate is customisable in look and feel as well as configuration, deployment, hosting and support and supports 'drag-and-drop' features, making it user friendly and easy to use.

Being 100% browser-based, employees needs only Internet Explorer (version 7 and above) to login and access eLearning. Almost no training is required for end-users, only the ability to use a mouse and keyboard.

i3Corporate, designed to support both technology and administrative functionality, allows customisation and offers customers the flexibility of selecting features and functions that best fits the organisation.

Our solution is powerful enough to allow corporate training departments to augment their educational offerings, enriching and expanding the scope of instruction delivery and assimilation.

The online social learning environment created by integrating self-directed materials with supplementary resources and optional collaborative interactions can be enhanced with collaborative tools such as live chats, discussions, video and live virtual classes.

- **Track and measure employee training history**
- **Fully managed by instructor without intervention by LMS administrator.**
- **Coursework enabled for individuals or groups of employees**
- **Assessments automatically graded**
- **Customisable interface and functions**
- **Secure login and access**
- **Easy navigation**
- **Built-in Communication Tools**
- **Pre-employment qualification**
- **24 X 7 accessibility**

Course Creators can...	Administrators can...	Instructors can...
<ul style="list-style-type: none"> • Store all learning objects, sorted and coded to access matrix, in a all-in-1 material repository. • Package the right objects into a new lesson plan using the learning object repository • Schedule distance learning and support students via online collaboration tools (email, discussion forums, chat, online mentoring, etc.) • Upload any SCORM or non-SCORM compliant content 	<ul style="list-style-type: none"> • Add, update, delete, archive, de-activate, upload and export user information • Manage course via sort, categorisation, search, view filtering • Assign temporary administration roles to multiple persons • Manage instructors • Track students' progress via 24/7 reports • Create single or multi-domains within single or multi URL's 	<ul style="list-style-type: none"> • Personalise user-interface • Track and report learning history • View outside training and special seminars • Schedule real-time virtual instructor classes • Use questionbank randomisation feature
Course Manager can ...	IT Tech Support can ...	Human Resource staff can ...
<ul style="list-style-type: none"> • Register and manage user • Customise enrolment process • Select enrolment courses • Process pre-requisite and co-requisite • Generate report on tracking and processing • Schedule compulsory course evaluations, multiple evaluations per course and collate evaluation data based on student feedback 	<ul style="list-style-type: none"> • Reduce the time spent on end-user support due to readily available documentation and online help/FAQs • Save installation time as no client software needs to be installed • Save cost as no clumsy or expensive client licensing mechanism required 	<ul style="list-style-type: none"> • Use online organisational reporting • Integrate system to HRMS and vice-versa • Assess question repositories and assessments • Manage employees' learning path • Nominate content to employees, while allowing individuals to self-enroll in elective courses.
