

**i3VTMS** (Volunteer Training & Management System) is THE eLearning platform tailored for large-scale online training

# Inchon **i3VTMS**

Product Info

## eLearning Platform for large-scale training

**i3VTMS** is a web-enabled tool that manages the training of a large group of volunteers who are assigned to various roles in large-scale national or sporting events.

Thousands of people are usually recruited at different stages and over a period of time to help manage, operate and oversee various activities to ensure complete success of such events.

The major challenge faced by organisers is to ensure that volunteers are effectively trained to their specific roles and that training are completed within a very tight schedule. In addition, knowledge and skills need to be consistently transferred to the volunteers regardless of when they are recruited.

**i3VTMS** is just the tool for managing, tracking and measuring the training of volunteers.

### Salient features of **i3VTMS** include:

- Provides role-based access rights for various types of users
- Tracks and measures learning of volunteers by their specific roles, groups and organizations they belong to (a key differentiator or USP)
- Supports online assessment and auto-grading
- Identifies previous training undertaken by volunteers and consequently, assign the new set of training should the roles of volunteers have been changed

- Supports all types of content, individual and group registrations
- Allows control of number of access either by different groups, at different times or at different sites. This means moderated access by different groups of volunteers according to their training requirements and timeline. At the same time, it ensures the high server availability to meet specific training needs of volunteers at peak durations

- Allows deployment of course evaluation and auto-compiles responses (quantitative and qualitative)
- Provides a wide array of reports that help organizers measure effectiveness of training at different levels of measurement, usage patterns of volunteers, assessment scores of volunteers, feedback reports among others.

- **Multi-Views — the learner management module is able to be managed in multiple views, as well as to interface with various manpower systems to retrieve updates of learner profile on daily basis**
- **Priority Queuing System — the access control module has a built-in priority queuing engine which allows instructors to allocate the appropriate number of concurrent access to different contingents based on the training timeline requirement. This ensures high level of server responsiveness by regulating learner access during peak period**
- **Learning History— i3VTMS handles changes in the role learning content assignment and retains learning history in accordance with the training modules assigned to each role. The learning history for common subjects in the previous role are carried forward if the role changes within a specific stipulated period**

### **i3VTMS — Key benefits to users**

Volunteers can ...	Trainers can ...	Administrators can ...
<ul style="list-style-type: none"> <li>• Access course material anytime, anywhere</li> <li>• Access quiz</li> <li>• Attempt assessments</li> <li>• View assessment reports</li> <li>• Submit assignments</li> <li>• View coursework reports</li> <li>• Communicate with instructors and other volunteers</li> </ul>	<ul style="list-style-type: none"> <li>• Manage, develop and assign courses</li> <li>• Register and manage volunteers</li> <li>• Instruct from anywhere, anytime</li> <li>• Create question bank and assessments</li> <li>• Track volunteers progress</li> <li>• Create assignments for online submission</li> <li>• Create &amp; manage online feedback</li> <li>• Communicate with the volunteers, other instructors and administrator</li> </ul>	<ul style="list-style-type: none"> <li>• Perform all tasks of trainers</li> <li>• Manage grade sets</li> <li>• Manage coursework components</li> <li>• Register and manage instructors</li> <li>• Manage course curriculum</li> <li>• Manage content providers</li> <li>• Manage learning scheme</li> <li>• Manage category communicate with instructors and volunteers</li> <li>• Get comprehensive reports</li> </ul>

Product Info

## Low cost, high reliability – when you cannot take a chance on training effectiveness

### Affordability and Scalability

As the product is built using Microsoft technology, educational institutions already enjoy academic license discounts for hardware and software required to run **i3VTMS**. The product is design to support large number of users, from tens of thousands to hundred thousands, so you can breathe easy knowing the growth path is not stymied with difficult migration or licensing plans.

### Standards Compliance

The system is designed to strict industry standards and specifications such as AICC, SCORM, IMS. Content with similar compliance standards can be readily deployed on **i3VTMS**. The system could also be easily integrated with other LMS and content management systems and any back-end systems.

### Multilingual, Unicode

**i3VTMS** has pre-set languages such as English, simplified Mandarin, traditional Mandarin and Bahasa Melayu. It can be customised to support other Unicode languages.

### Rapid Deployment

A standard off-the-shelf system that can be up and running within 5 man days.

### Fully Customizable

Highly flexible platform with multi-tier, template-based architectural design can be customized extensively to suit customer's requirements.

### Ease of Integration

The System makes use of a standards-based software technology that allows it to bridge the communication gap with other enterprise systems.

### Proven System

Educational institutions enjoy low total cost of ownership, high customisability, local support, product scalability and a no-nonsense deployment methodology.

### Interoperability

**i3VTMS** is built to international standards and specifications to enable it to import the content created using these standards. It is also capable of creating, importing and exporting course content from or to other systems. It also supports interoperability in managing assessments. The system uses IMS QTI standards for its assessment engine.

### Mobile and Smartphones

**i3VTMS** can be customized to authenticate access and integrate contents from mobile PDAs, touch tablets and smartphones, befitting today's advanced consumer technology; and ensuring continuous access by the children of today.

### SMS Integration

**i3VTMS** can be integrated to device SMS or server SMS to allow fast transmission and reply in situations of last minute class and timing changes.

### i3VTMS

customers include:

- F1 2009
- YOG
- Elections Department
